Notes
1. Material is RedLINE.
2. This detail illustrates a typical application.
   Refer to project specific details for more information.
3. Use a metal masking tape to cover the RedLINE gland during spraying operations. Remove tape before spray foam has set.

PLAN / SECTION

Cover ALL of the white fleece with membrane

Coating layer encapsulating the RedLINE

Spray-applied polyurethane foam layer

Substrate

Joint packed with compressible batt insulation or a backer rod
